About

I am a final year Computer Science student at Bina Nusantara University who has developed logical and problem-solving skill through my degree, as well as communication and team-managing skill through my organizations. Now I'm looking to further develop and implement my skills in the real world.

Experience & Achievement

2nd Creative Software Competition Finalist

Bina Nusantara Univ. (2018)

Together with my team, we developed an innovative online sports field booking app using Bootstrap and PHP.

Director of Art

FILE Magz (2017-2018)

I developed my teamwork and design skill by creating social media content, greeting card, advertisement, and made sure every content designed by others fulfill the standardization in a young-technology-business based portal media under BiNus Computer Club (BNCC).

Master of Ceremonies

BNCC (2017-2018)

I developed my communication & public speaking skill in BNCC Meetup: "Effective Approach to Attract Top Talent", and the biggest BNCC's event, BNCC Techno Career 2018.

Database Admin Intern

Blibli.com (2019-2020)

With dozens of existing and upcoming microservices, I've created automations with Ansible to setup MongoDB & PostgreSQL replication, load balancer, backup tool, and configuration. I've also done dump & restore for DB migration, analyzed query plan, troubleshoot on DB system's problem, and created a web based dashboard to monitor the backup.

Coordinator

Ancilla Domini Choir (2018)

I developed my team-managing and decision-making skill by handling a team of Church choir under Keluarga Mahasiswa Katolik Binus.

Certification

Responsive Web Design freeCodeCamp (2020)

I've completed 300 hours of coding challenges and projects about HTML & CSS.
